## MANUAL & AUTO START CONTROL MODULE

### FEATURES

The DSE3110 can be utilised as a Manual or Auto Start Module for single gen-set applications or engine only applications. The module has been designed to work with electronic and non-electronic engines, providing advanced engine monitoring and protection features.

The DSE3110 includes a back-lit icon LCD display which clearly shows the status of the engine at all times.

The module monitors engine speed, frequency, voltage and engine run hours and also displays the warning and shutdown status.

The module includes fixed and flexible outputs as well as configurable inputs making this product ideal for a wide variety of applications. The module can either be programmed using the front panel or by using the DSE Configuration Suite PC software.

The module is available in two variants:

- CAN** – For use with electronic engines only.
  - Optional frequency (Hz) sensing from main AC alternator for gen-set applications.

- MPU/ALT.** – For use with non-electronic engines only (magnetic pick-up/alternator sensing).
  - Optional frequency (Hz) sensing from main AC alternator for gen-set applications.
  - Optional Magnetic Pickup speed sensing.
