

DSEBC1205 / DSEBC2405

12 V 5 AMP BATTERY CHARGER / 24 V 5 AMP BATTERY CHARGER

The **DSEBC1205** and **DSEBC2405** battery chargers are designed to be permanently connected to a battery, to ensure it maintains a full charge.

The chargers include LED indicators on the front that show when there is no battery connected and also if a fault condition is present.

The chargers continue to operate during cranking and running and have been designed to accept multiple AC voltage connections.

The robust design makes the chargers ideally suited to a wide range of markets including heavy and light industrial environments.

The chargers can be mounted vertically or horizontally for complete flexibility across multiple application types.
